## Overview

HPE Networking Instant On Switch 1430

Technology brings new revenue opportunities, more effective communication, and improved productivity to businesses of all sizes. Yet it also poses daily challenges of configuration and maintenance, especially for small businesses who lack IT support. Small offices and home offices need reliable network connectivity that's fast, configuration-free, and affordable for even the most budget-strapped businesses.

The HPE Networking Instant On Switch 1430 is a plug-and-play unmanaged switch series for small businesses looking for simple, reliable, and low-cost network connectivity. These easy-to-use switches deliver Layer 2 Gigabit Ethernet switching capabilities — at an affordable price point — to help connect and share common resources like printers and access points, without any complicated network configuration. With plug-and-play operation, fully automated functions, zero ongoing maintenance, and Power over Ethernet (PoE) models, these switches deliver simple, reliable connectivity for the smallest SMBs and home offices.

The HPE Networking Instant On Switch 1430 includes seven switches in PoE and non-PoE configurations: one (1) 5-port, two (2) 8-port, two (2) 16-port, one (1) 24-port, and one (1) 26-port model with 2 SFP uplinks models. With the PoE models, you get up to 30W PoE per port power delivery for Class 4 PoE devices like access points, surveillance cameras and VoIP phones. The 8-port and 16-port PoE models come with the power budget of 64W and 124W respectively to support the latest IoT devices. All switches are fan-less, making them ideal for acoustically sensitive areas, and unmanaged requiring no configuration (not managed by HPE Networking Instant On management).

HPE Networking Instant On Switch 1430 Family

Overview

Key Features

- Unmanaged Layer 2 Gigabit Ethernet switch series ready to deploy in 5-, 8-, 16-, 24-, and 26-port models
- Up to 124W of PoE to power APs, IP Phones, and other IoT devices
- No configuration or management needed
- Plug-and-play with fully automated functions and zero ongoing maintenance
- Quality of Service (QoS) and flow control for improved network efficiency
- Fan-less with Energy Efficient Ethernet for low power consumption
- Class B certified for home office networks (5 and 8 port models)

Standard Features

Simplicity at its Best
- Plug-and-play switches that work right out of the box
- Zero configuration required

Reliable Connectivity
- Connect faster with Gigabit Ethernet speed
- PoE to power devices like APs and IP phones

We've Got You Covered
- Industry-leading limited lifetime warranty and support
- 24 x 7 chat support for entire warranty period

The Networking Instant On Differentiators
Better Together
HPE Networking Instant On products work together to provide a seamless Wi-Fi experience. Wired and wireless voice traffic is prioritized with high QoS priority end-to-end for optimal voice performance.

Industry-Leading Support and Warranty
Expert-level support and industry-leading limited lifetime warranty are also included, along with chat support for the life of the product.

Plug-and-Play
Gigabit Ethernet speeds
Supports half/full-duplex auto-negotiating capability on access ports that doubles the throughput of every port.

Long Distance Fiber Connectivity
26-port model includes two 1G SFP fiber ports for uplinks and to support long distance connectivity using fiber transceivers, for a total of 28 Ethernet ports.

Simplified Cabling
Automatically adjusts for straight-through or crossover cables on all 10/100/1000 ports using Auto MDI/MDI-X.

Ethernet Alliance PSE Class 4 Poe Certification
Power Over Ethernet (PoE) functionality is supported on two 1430 models that provide up to 30 W per port, which allows support of Class 4 PoE or IEEE 802.3at-capable devices such as video IP phones, wireless access points, as well as any 15.4 W IEEE 802.3af compliant end device, thereby eliminating the need for additional electrical cabling and circuits.

EAPoL frames forwarding
802.1x EAP over LAN frames are forwarded through the switch so that clients can authenticate when the device gives connectivity between an authenticator and supplicants.

STP BPDU frames forwarding
The switch forwards the BPDU frames to make sure that Spanning Tree Protocol works correctly preventing loops in the topology.

Traffic Optimization
Prioritize Voice and Video
Quality of Service provides priority of time-sensitive packets (like VoIP and video) over other traffic based on DSCP or IEEE 802.1p classification.

Flow Control
Provides a flow-throttling mechanism propagated through the network to prevent packet loss at a congested node.

Standard Features

Jumbo Frame Support
Provides up to 9216 bytes frame size to improve the performance of large data transfers.

Warranty, Service and Support
HPE Networking Instant On Limited Lifetime Support provides 24X7 phone support for the first 90 days and chat support for the entire warranty period. Community support is included for the life of the product.

Mounting	
Mounting positions and supported racking	• Mounts in an EIA standard 19 in telco rack or equipment cabinet. 2-post rack kit included • Supports table-top mounting • Supports rack-mounting using the brackets provided • Supports wall-mounting with ports facing either up or down using either the base surface mounting holes, or the brackets provided • Supports under-table mounting using the brackets provided • Must be mounted top surface up. To prevent possible impact to long-term reliability, product should not be mounted upside-down
