cooking

Dual layer steam valve
for overflow protection

6 cooking
functions

Smart black
display

24-hour
scheduling

Detachable dual-layer steam valve Locks in fragrance and prevents spillage

The steam valve, with two rows of six holes, quickly releases gas while boiling to prevent overflow when cooking congee on high heat while still preserving the aroma. Detachable design for thorough cleaning to ensure there are no missed spots.

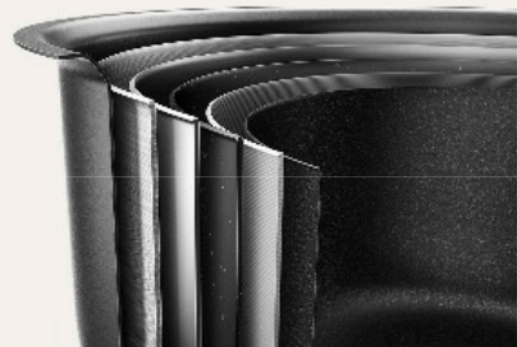

Powerful 3D IH technology bringing out the full flavour of rice

Equipped with a powerful induction coil for even electromagnetic heating 3D[®] throughout the inner pot, it enables rice to be heated and cooked thoroughly.

The 6-layer thick inner pot provides even heating, no sticking and is more durable

The 2.0mm-thick inner pot uses a heat-efficient design for even cooking. Its non-stick surface makes cleaning effortless and a reinforced black crystal coating provides enhanced durability and wear resistance.

26-minute ultra-fast rice cooking*—balancing taste and speed

With optimised cooking efficiency that delivers excellent flavour, the 26-minute quick cook function ensures the rice is ready in the time it takes you to cook accompanying dishes, so you can enjoy a hot, delicious meal on time.

24-hour scheduling and 12-hour keep-warm functions ensure your meals are always ready for you

Schedule operations in advance for leisurely breakfasts and warm dinners ready when you get in from work. A hectic lifestyle doesn't mean skipping delicious meals.

Add ingredients before bed at 10 PM, schedule for 10 hours for a sumptuous 8 AM breakfast.

Premium craftsmanship with thoughtful designs

Precise water level indicator

Rice paddle, measuring cup, and steamer provided

Detachable inner lid

Larger condensation collector
