- Warranty notice *1

Precision Cooling for Every Ingredient

Mijia Refrigerator Cross Door 510L delivers outstanding fresh storage with intelligent zones designed for modern lifestyles. The i Fresh convertible zone offers adjustable temperatures from -1°C to 5°C,¹ catering to various food types, ensuring optimal preservation. Ag+ Fresh technology, powered by silver ion modules, effectively suppresses bacteria with 99.99% efficiency and eliminates odors, keeping storage clean and fresh.² With 510L of customizable space across fridge, freezer, and convertible zones, users enjoy flexible organization and easy access to groceries. Meanwhile, Smart modes including Auto, Super Cool, and Super Freeze—adapt quickly to usage scenarios, maintaining food quality with minimal effort.

Designed for the Connected Lifestyle

Intelligent control becomes a seamless part of daily life through advanced connectivity and smart integration. Built-in Wi-Fi enables remote temperature adjustment, mode switching, and real-time alerts via Xiaomi Home app. Users can also integrate the refrigerator into their smart home ecosystem, benefiting from OTA software updates and 24-hour self-diagnosis for reliable, long-term performance. A smart notification alerts users when the door remains open for over two minutes, minimizing energy waste and keeping food fresh. Designed to complement connected lifestyles, Mijia Refrigerator Cross Door 510L offers effortless hands-free control with Google Assistant,³ allowing users to adjust temperature using voice commands.

Effortless Control for Maximum Convenience

Mijia Refrigerator Cross Door 510L also delivers a refined user experience with thoughtful features designed for everyday convenience. Equipped with a dual inverter system, it offers stable, energy-efficient performance while maintaining a low noise level—ideal for quiet home environments. The front-facing touch panel allows intuitive control over individual temperature zones and mode settings, making operation simple and responsive. And with a 90° door opening angle, users can fully access drawers even when the appliance is placed against a wall, maximizing usability in compact spaces. Lastly, a contemporary aesthetic with slate gray metallic doors and a stony finish adds a modern, minimalist touch that blends seamlessly into any home.

¹ Data obtained from Xiaomi Internal Labs. Actual results may vary.

² Ag+ Fresh is available in the refrigerator compartment (including the customizable-temperature drawer) only. Tested by CVC Testing Technology Co., Ltd. for the pollutants trimethylamine and methyl mercaptan, report No.: WTS2025-2849-1.

³ Compatible Google Assistant-enabled devices are required. Google Assistant is not available in certain languages and countries. Google, Google Home and Google Nest Mini are trademarks of Google LLC. Google Assistant only supports setting and querying the temperature of the Fridge, Freezer, and i Fresh convertible zone. It does not support setting Auto, Super Cool, or Super Freeze modes.
