

### INDOOR CCTV COMPATIBLE DESKTOP UPS

#### The desktop UPS designed for power protection of surveillance systems

Ideal for indoor surveillance systems, home and office applications, the BU CCTV Series adopts line-interactive topology with Automatic Voltage Regulation (AVR) function to offer stabilized AC power output. Its CCTV/Quick Charge Mode Switch gives users more flexibility to suit needs. The default CCTV Mode lowers operating temperature for a longer UPS battery life, while Quick Charge Mode prompts battery recharge time. The products are compatible with generators to prolong power continuity. The desktop design with mounting slots makes installation easy on walls and/or other locations for surveillance systems.

NOTE: AVR function can be enabled only in Quick Charge Mode.
